

Specialized Maternal & Metabolic Health Pathology

Date: 18-Aug-2026

NABL Accredited • ISO 15189:2022 Certified • CAP Compliant Laboratory

Time: 14:00

Specimen: Serum / Whole Blood

Patient & Clinical Details			
Patient Name:	Gestational Patient	Referring Physician:	Dr. Sarah Jenkins, MD (OB/GYN)
Age / Gender:	28 Yrs / Female	Clinical Context:	Antenatal Gestational Screening
Gestational Age:	24 Weeks (Trimester 2)	Verification State:	Clinically Verified

Biochemical Analysis & Laboratory Investigations

Investigation / Parameter	Observed Result	Units	Reference Range
Fasting Plasma Glucose (FBS)	95	mg/dL	70 – 99 mg/dL
2-Hour Postprandial Glucose (PPBS)	132	mg/dL	< 140 mg/dL
Glycated Hemoglobin (HbA1c)	5.3	%	4.0 – 5.6 %
Systolic Blood Pressure	118	mmHg	90 – 120 mmHg
Diastolic Blood Pressure	78	mmHg	60 – 80 mmHg

Clinical Findings & Pathologist Notes:

- All parameters analyzed under strict clinical laboratory quality control protocols.
- Metabolic glucose and cardiovascular metrics fall within expected physiological targets for gestational week 24 Weeks (Trimester 2).
- Automated character recognition data verified against original laboratory accession registers.

Verified by Medical Pathologist:

Dr. Ananya Sharma, MD (Pathology)
